EXPERIENCE

AttackIQ (Contractor, full time)

Remote

Senior Software Engineer (Frontend)

June 2019 – June 2023

- Worked with a team in migrating a substantial legacy AngularJS codebase to React, significantly improving performance and user experience.
- Successfully migrated the Internal CMS UI to Refine, a React framework for internal tools, enhancing usability and functionality.
- Created a knowledge base using Gatsby (React Static site generator), providing a valuable resource for team members.
- Implemented a monorepo architecture with NX, streamlining release processes and reducing errors.
- Mentored and onboarded new team members, ensuring rapid integration into the team.
- Played a key role in shaping architectural changes and making technical decisions for the platform's frontend.
- Technologies used: React, MUI 5, SCSS, React-query, React hook forms, Zustand, Nx, Webpack 5, Cypress, Testing Library, Refine, Python/Django.

Acamica (Part time teaching job)

Remote

Student Mentor

April 2020 – November 2020

- Instructed students in a "Full-stack web development" bootcamp, covering topics such as HTML/CSS, accessibility, SCSS, Agile, JavaScript, Git, Node, npm, Express, MySQL, Sequelize, MongoDB, and OWASP Top 10.

Endava (Staff Augmentation for Ordergroove)

Rosario, Sta Fe, Argentina

Developer

September 2018 – June 2019

- Contributed to both the frontend and backend of Ordergroove's Subscriptions solution, an add-on for e-commerce websites to facilitate product subscriptions.
- Technologies used: Python/Django, AngularJS.

Globant (Staff Augmentation for Deloitte)

Rosario, Sta Fe, Argentina

Web UI Developer

August 2017 – September 2018

- Developed user interfaces for VC Planner, a web platform that resembled a Google Calendar for booking conference rooms.
- Technologies used: Angular, RxJS, TypeScript, Git.

Kit Urbano (Freelance Project)

Rosario, Sta Fe, Argentina

Full Stack Developer

October 2016 – February 2017

- Rectified existing issues and completed the "Percepcion Ciudadana" project, a survey platform for the public sector.
- Technologies used: PHP, Kohana Framework, jQuery, SCSS.
